Disclaimer

This document is solely in its whole represent a sample work of how to write a Release Notes.

It has got no correlation with WhatsApp and its related elements and hence does not authenticate any process, code, and system under the mentioned entities of WhatsApp.

The author acknowledges all the credibility of the content of WhatsApp and its entities for the image and content of their source material.

Please do not use this as a release notes to obtain any result of any interfaces of WhatsApp as these transactions can result in data loss.

1. Overview

This release introduces new usability features, improves performance, and fixes several bugs to enhance the WhatsApp experience across platforms.

2. New Features

Features	Description
Screen Sharing with Audio	Start a video call. Tap the screen share icon. Select “Share with audio” option.
Multi-Account Support	Go to Settings > Account. Select “Add Account” to log in to another number. Switch accounts easily from the same screen.
Edit Message History	Long press an edited message. Tap “View edit history”. Only you can view previous versions.

3. Improvements

Improvement Area	Details
Improved Voice	Improved voice message clarity by reducing background noise.
New Shortcut	New shortcut for group privacy settings: Go to Settings > Privacy to quickly manage who can add you to groups.
Faster Loading	Faster loading of chats with many photos and videos.

4. Bug Fixes

Issues	Fixing Details
App Crash	Fixed app crash when opening archived chats on some Android 13 devices.
Notification Delay	Resolved push notification delay in iOS 17.
Sticker Panel Overlapping	Fixed sticker panel overlapping issue on tablets in landscape mode.

5. Security Update

- Android now supports Passkey Login (use device PIN/fingerprint).
- Regular encryption and privacy updates applied.

6. Deprecations / Compatibility Notes

- WhatsApp will no longer support Android 5.0 and iOS 12 from version 2.25.0 onwards.
- WhatsApp Web has Dark Mode enabled by default.

7. How to Update

1. Go to the platform's app store or website.
2. Search for WhatsApp.
3. Click Update or follow the upgrade instructions.
